

considered adequate to detect all cases of infestation and, since the effectiveness of methyl bromide fumigation in freeing this product from the insect in question is now well established, it has been decided to require this fumigation as a condition of entry for future shipments.

(b) On and after December 7, 1939, therefore, fumigation with methyl bromide will be a condition of entry for all shipments of cipollini from Morocco. This treatment shall be carried out under the supervision of a plant quarantine inspector at the expense of the importer, and release of the shipment will be withheld until the treatment has been completed. In addition to fumigation only such inspection will be given as the inspector may judge necessary from time to time to determine pest conditions on arrival or to ensure the effectiveness of the treatment.

(c) The entry of cipollini from Morocco may be made only through the ports of New York and Boston at which ports facilities for vacuum fumigation with methyl bromide, as herein required, are available.

[24 FR 10788, Dec. 29, 1959. Redesignated at 50 FR 9788, Mar. 12, 1985; 70 FR 33325, June 7, 2005]

§ 319.56–2f Conditions governing the entry of baby corn and baby carrots from Zambia.

(a) Immature, dehusked “baby” sweet corn (*Zea mays* L.) measuring 10 to 25 millimeters (0.39 to 0.98 inches) in diameter and 60 to 105 millimeters (2.36 to 4.13 inches) in length may be imported into the continental United States from Zambia only under the following conditions:

(1) The production site, which is a field, where the corn has been grown must have been inspected at least once during the growing season and before harvest for the following pest: *Phomopsis jaczewskii*.

(2) After harvest, the corn must be inspected by Zambia’s national plant protection organization (NPPO) and found free of the pests listed in paragraph (a)(1) of this section before the corn may be shipped to the continental United States.

(3) The corn must be inspected at the port of first arrival as provided in § 319.56–6.

(4) Each shipment must be accompanied by a phytosanitary certificate issued by the NPPO of Zambia that includes an additional declaration stating that the corn has been inspected and found free of *Phomopsis jaczewskii* based on field and packinghouse inspections.

(5) The corn may be imported in commercial shipments only.

(b) Immature “baby” carrots (*Daucus carota* L. ssp. *sativus*) for consumption measuring 10 to 18 millimeters (0.39 to 0.71 inches) in diameter and 50 to 105 millimeters (1.97 to 4.13 inches) in length may be imported into the continental United States from Zambia only under the following conditions:

(1) The production site, which is a field, where the carrots have been grown must have been inspected at least once during the growing season and before harvest for the following pest: *Meloidogyne ethiopica*.

(2) After harvest, the carrots must be inspected by the NPPO of Zambia and found free of the pests listed in paragraph (b)(1) of this section before the carrots may be shipped to the continental United States.

(3) The carrots must be inspected at the port of first arrival as provided in § 319.56–6.

(4) Each shipment must be accompanied by a phytosanitary certificate issued by the NPPO of Zambia that includes an additional declaration stating that the carrots have been inspected and found free of *Meloidogyne ethiopica* based on field and packinghouse inspections.

(5) The carrots must be free from leaves and soil.

(6) The carrots may be imported in commercial shipments only.
